14. ABSTRACT (Maximum 200 words): This report describes the updating of ARI's educational benefits usage database with Montgomery GI Bill and Army College Fund data for Army Regular, Reserve, and Guard components over the 2010 and 2011 period. For the Regular component, the report includes tabulations of program participation and benefit usage, type of educational program entered, and time between separation and start of education benefits. For Reserve and Guard components, the report includes tabulations by benefit eligibility status, VA training time type, and type of educational program entered. The tabulations are presented by entry cohort, going back to the 1985 entry cohort for all three components, and by separation year for the Regular component.

Updating ARI Databases for Tracking Army College Fund and Montgomery GI Bill Usage for 2010-2011

Introduction

The provision of educational benefits is an important and expensive Army program designed to aid recruiting and to address larger social goals. Accordingly, the U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) collects and analyzes program participation and benefit usage information and provides it to Army G-1 (Deputy Chief of Staff for Personnel) to support its reporting to Congress. The ARI educational benefits usage database collects source data from Army personnel records, the Defense Manpower Data Center (DMDC), and the Veterans Administration (VA). Program participation and benefit usage rates for Army College Fund (ACF) and Montgomery GI Bill (MGIB) programs are calculated for each accession cohort.

Two databases were processed, updated, analyzed, and archived in this effort. The ACF database contains data on individual Soldiers who enlisted between fiscal years 1981 and 1986; the MGIB database contains data on individual Soldiers who enlisted after 1 July 1985 and enrolled in the Montgomery GI Bill program.¹

Army College Fund Database

The ACF/Chapter 32 database was updated on an annual basis from 1986 to 2002. The database was created originally using the Army Accessions data files from the U.S. Military Entrance Processing Command (MEPCOM). The database was divided into three separate cohorts: the FY81/82 accessions cohort, the FY83/84 accessions cohort, and the FY85/86 accessions cohort. The data for each cohort were updated annually using the latest information on benefits usage from VA Chapter 32 data until 2002. At each update, critical information was first extracted from the data file and then merged into each of the three cohort files. A different set of variable names by time period and cohort was used for each update to support longitudinal analyses.

At the end of each fiscal year, DMDC provides ARI with a “de-identified” (i.e., with all personally identifying information removed) copy of the VA Chapter 32 data for selected record types. Nearly 3.9 million records were received on the FY09 VA benefit usage data file. These records contain information on contributions and benefit usage, educational objective and level, and related facility and training information.

The FY10 VA Chapter 32 data file from DMDC contained a total of 3,838,448 records. This file was copied and archived onto CD-ROM after processing and verification of data records.

¹ A third database of interest is the Post-9/11 Veterans Educational Assistance Act of 2008 or Post-9/11 GI Bill which contains information on a new veterans benefit program that went into effect on 1 August 2009. This program provides a vehicle for Soldiers who served after September 11, 2001 to receive educational benefits and an option to extend such benefits to their spouse and dependents. The data file was not made available in time for processing during the current updating effort as originally intended.

Previous efforts from 1986 to 2002 used the most recent VA Chapter 32 data to update information on the ACF FY81/82, FY83/84, and the FY85/86 accessions cohorts. In this latest update, all of the FY10 Chapter 32 data, along with similar data from FY03 through FY09, were also archived to facilitate future updates when there is such a need.

Montgomery G.I. Bill Database

The MGIB database was started in 1991 and was originally updated on an annual basis. Since March 1993, ARI has received update tapes from DMDC on a quarterly basis. This allowed the analysis of MGIB usage on a quarterly basis.

Around the fall of 1999, DMDC began to convert the existing legacy system into the Defense Enrollment Eligibility Reporting System (DEERS). As a consequence, no MGIB data were available from DMDC until April 2002. The first quarterly data containing Regular Army records received from DMDC after the conversion was as of September 2001, with a new record layout, data dictionary, and more variables than previously provided on the quarterly files. With the help of DMDC staff familiar with the database, we were able to identify the variables needed for analysis. In April 2002 we also began receiving quarterly data files for the Army Reserve and National Guard. Prior to that point, data were only available for Soldiers in the Regular Army.

Seven quarterly MGIB data files were processed for the current effort: December 2010 through June 2012. Upon the processing of each quarterly “de-identified” data set, three sets of tabulations were created: one for the Regular Army, one for the Army Reserve and one for National Guard. Four quarterly MGIB data files were selected to be used to produce the tables: December 2010, March 2011, June 2011, and September 2011. The remaining three MGIB quarterly files that were not used for reporting were archived to CD.

While creating the March 2010 tabulations, we discovered a problem with the MGIB Chapter 1606 (Reserve and Guard) data. There was a dramatic increase in cases where the VA Training Time Type Code (byte 55) and VA Training Category Code (byte 54) were coded as unknown. Overall, an alarming 94% of the cases had a value of "Z" for "Unknown" in one or both of these fields. We checked the March 2009, June 2009, September 2009 and December 2009 Ch1606 quarterly data files for cases with similar unknown values for these two variables and found that the ratio of these cases remained constant at about 81% across all these earlier files. This situation was reported to DMDC. Further inspection of these data indicated that the VA has erroneously updated the replication table with unknown values in these two variables. Unfortunately, due to limited resources at the VA, this problem was not corrected in time for this reporting period. Only Table 3 for the Reserve and National Guard tabulation was affected by this problem starting with March 2010. The tabulations for the Regular Army were not affected.

For the Regular component, this report includes tabulations of program participation and benefit usage, type of educational program entered, and time between separation and start of education benefits. For Reserve and Guard components, tabulations are provided by benefit eligibility status, VA training time, and type of educational program entered. The tabulations are presented by entry cohort, going back to the 1985 entry cohort for all three components. Benefit usage figures for recent cohorts in the Regular component are small / low as would be expected for this type of

program. As cohorts age and members leave the Service, usage rates pick up. An estimate of steady state usage rates can be inferred from the older cohorts.

An additional new set of tables was created under this effort for Regular Army that focuses on time between separation and MGIB benefit usage for veterans. Instead of using entry cohort, separation cohort from 1988 to 2010 was used in the analysis of benefits usage rates. . Benefit usage is reported for Veterans with three or four years of service and also for those with years of service greater than four years, and for those who took advantage of the program within first 2 years after separation and within 10 years after separation.

At the conclusion of the current effort, 14 additional quarterly files were processed and available for analysis. These files are:

<u>Type</u>	<u>Date</u>	<u>Total Cases</u>
Regular Army	1 st quarter 2011 (as of December 2010)	2,232,251
Regular Army	2 nd quarter 2011 (as of March 2011)	2,246,901
Regular Army	3 rd quarter 2011 (as of June 2011)	2,264,345
Regular Army	4 th quarter 2011 (as of September 2011)	2,279,188
Regular Army	1 st quarter 2012 (as of December 2011)	2,293,923
Regular Army	2 nd quarter 2012 (as of March 2012)	2,308,658
Regular Army	3 rd quarter 2012 (as of June 2012)	2,325,362
Reserve/Guard	1 st quarter 2011 (as of December 2010)	2,516,597
Reserve/Guard	2 nd quarter 2011 (as of March 2011)	2,530,683
Reserve/Guard	3 rd quarter 2011 (as of June 2011)	2,548,826
Reserve/Guard	4 th quarter 2011 (as of September 2011)	2,570,237
Reserve/Guard	1 st quarter 2012 (as of December 2011)	2,590,849
Reserve/Guard	2 nd quarter 2012 (as of March 2012)	2,611,461
Reserve/Guard	3 rd quarter 2012 (as of June 2012)	2,630,183

Tabulations and Documentation

Tabulations of the updated MGIB databases are presented in four appendixes. As described previously, each appendix presents a series of tables for each cohort year as detailed below. Each series of tables is presented four times, representing quarterly reports generated for December 2010, March 2011, June 2011, and September 2011.

Appendix A: MGIB Regular Army Analysis Tables (by Cohort Year)

- Table 1: Takers
- Table 2: Users
- Table 3: Percent Users
- Table 4: Type of Education Program Entered
- Table 5: Time Between Date of Separation and Start of Army College Fund
- Table 6: Time Between Date of Separation and Start of Army College Fund (Percent of Cohort)

- Table 7: Time Between Date of Separation and Start of MGIB Alone Usage
- Table 8: Time Between Date of Separation and Start of MGIB Alone Usage (Percent of FY Cohort)

Appendix B: MGIB Regular Army Analysis Tables (by Separation Year)

- Table A: MGIB Benefit Usage for Veterans for Years of Service EQ 3-4 (within 2 years after separation)
- Table B: MGIB Benefit Usage for Veterans for Years of Service GT 4 (within 2 years after separation)
- Table C: MGIB Benefit Usage for Veterans for Years of Service EQ 3-4 (within 10 years after separation)
- Table D: MGIB Benefit Usage for Veterans for Years of Service GT 4 (within 10 years after separation)
- Table E: MGIB Benefit Usage for Veterans for Years of Service GE 3 (within 2 years after separation)
- Table F: MGIB Benefit Usage for Veterans for Years of Service GE 3 (within 10 years after separation)

Appendix C: MGIB Army Reserve Analysis Tables and Appendix D: MGIB National Guard Analysis Tables

- Table 1: SR Basic Benefit Eligibility Status
- Table 2: VA Training Time Type
- Table 3: Type of Educational Program Entered FY1985-2010 Cohorts

A compact disk (CD-ROM) has been prepared and is available for Army G-1 and other Army agency use upon request to ARI. It contains electronic versions of the FY10 ACF data file, FY11 and FY12 MGIB data files, record layouts, data dictionary, SPSS transport files for MGIB databases, MGIB analysis tables, and this report.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

MGIB FY11 UPDATES: Regular Army by Separation Year

*** Enlistment Cohort: 1985-2006 ***
 *** Separated between 1988-2010 ***

Table A: MGIB Benefit Usage for Veterans
 For Years of Service EQ 3-4

Separation Cohort	Takers	Benefit Users within First 2 Years after Separation	Benefit Usage Ratio
1988	758	181	23.9%
1989	20,462	8,313	40.6%
1990	34,253	14,951	43.6%
1991	27,005	11,236	41.6%
1992	45,818	18,166	39.6%
1993	26,960	10,292	38.2%
1994	19,038	7,028	36.9%
1995	18,700	6,790	36.3%
1996	19,776	7,251	36.7%
1997	14,741	5,026	34.1%
1998	14,703	4,928	33.5%
1999	12,029	3,981	33.1%
2000	16,126	5,121	31.8%
2001	22,481	7,797	34.7%
2002	20,127	7,183	35.7%
2003	17,849	6,062	34.0%
2004	27,531	11,287	41.0%
2005	24,350	10,040	41.2%
2006	19,190	8,159	42.5%
2007	17,369	7,776	44.8%
2008	14,803	6,143	41.5%
2009	15,464	2,796	18.1%
2010	12,298	826	6.7%

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.

NOTE: An undercount of Army College Fund (ACF) participants for the 1997-1999 cohorts was acknowledged in 1999 by the Army Personnel Command (PERSCOM). The undercount was a result of the ACF data element not being populated in the Army system for those years. After the problem was discovered, PERSCOM attempted to re-capture the missing information for those cases. Unfortunately, many of the 1997-1999 Army cases had already separated from active duty and their records no longer existed in the Total Army Personnel Data Base (TAPDB) system.
